cmd_key HOG

Keyboard for HOG 4
Programmed for High End Systems HOG 4 Family

The **cmd_key HOG** from High Output is a 75 key keyboard that is programmed and ready to take with you on your next HOG 4 Family programming gig. With a near identical layout to current HOG 4 Family Consoles from High End Systems, Inc., the **cmd_key HOG** allows users to easily switch from full-sized desks to portable or secondary ones, without having to re-learn the mapping of the keys. With silent Cherry MX Black keys that are mounted on a steel frame in a small form factor, the **cmd_key HOG** give users a tool for when they do not have the space or the need for a full-sized console but still want to maintain the professionalism and productivity of having a HOG 4 desk. The keyboard utilizes a splash of color under the keys to allow users to quickly determine which section they are looking for when muscle memory fails. With a built in two port USB hub, you can safely store and use your ETCnomad dongle as well as connect a mouse or other peripherals.

Features

- 75 pre-mapped keys for HOG 4 control consoles
- Familiar keyboard layout to the current HOG 4 keyboard
- Industrial grade Cherry MX Black key switches result in a fluid and silent programming experience
- Sturdy construction built around a steel key frame for reliability and durability
- Color-coded zones for easy navigation
- Built-In 2 Port USB Hub for Mouse and ETCnomad dongle(not included)
- Pad-printed Key legends on keycap covers for easy reading in low light
- Updatable - **cmd_key HOG** can be updated as HOG evolves over time.
- 2 year Limited Warranty
