

Instructions to update your cmd_key to v4 for EOS 3.1 compatibility

(1)

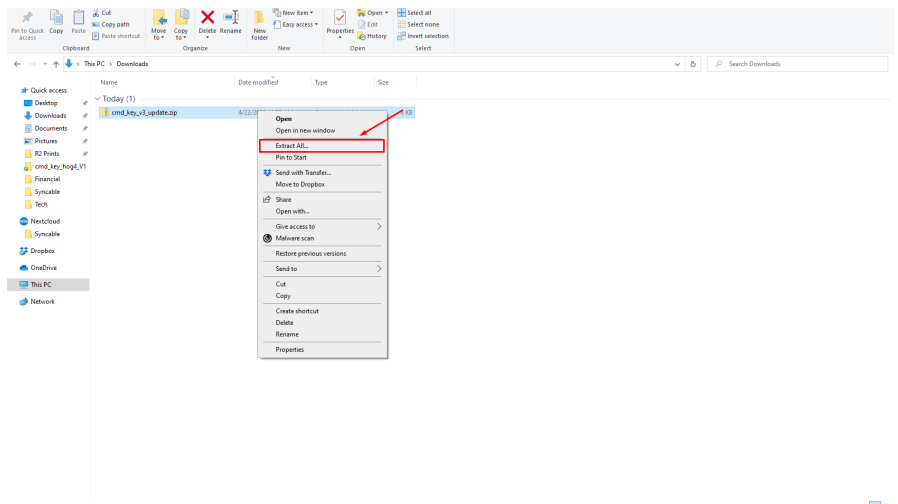

Download ZIP from Website

www.cmd-key.com

cmd_key_eos_v4_update.zip

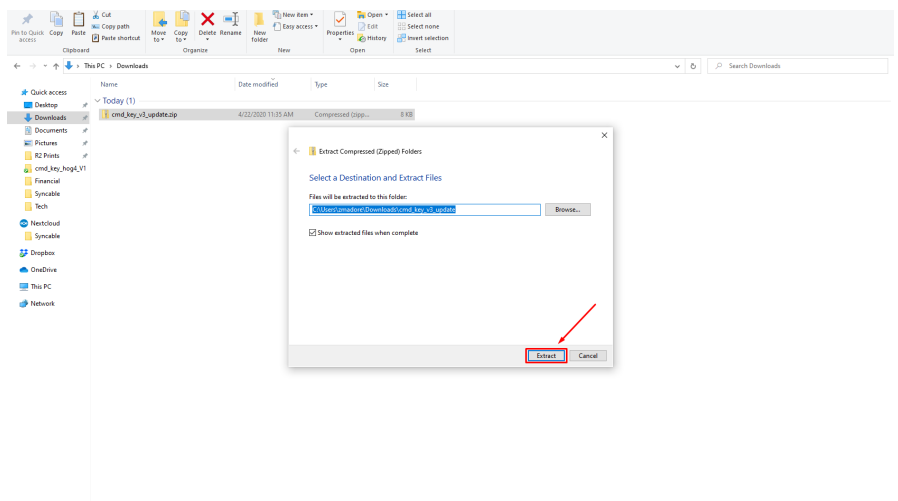

(2)

Right Click on Zip File and click extract all

(3)

Click Extract on bottom of window. Make sure the “Show extracted files when complete” is checked. If not, you will need to open the un-zipped folder manually.

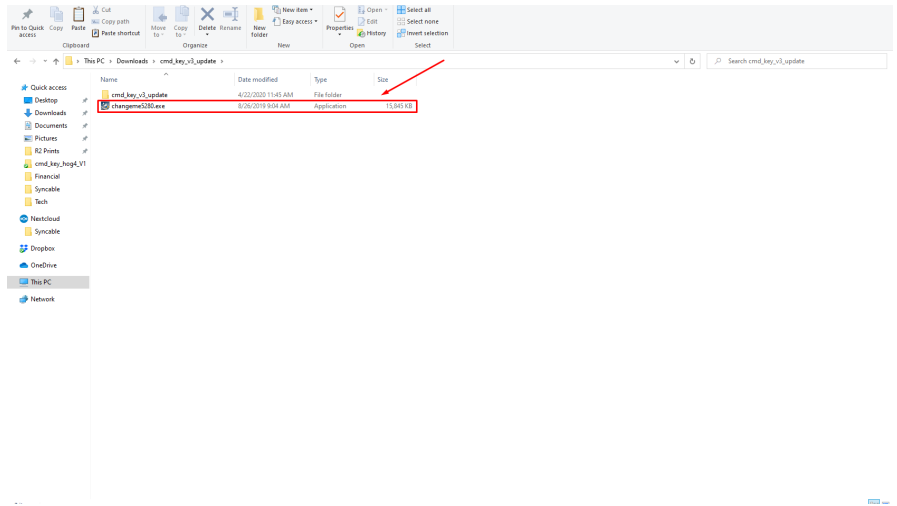

(4)

Click on Installer

Wait as the installation process proceeds, Click **next/install** as required

Restart computer when prompted

(5)

Re-open file location after reboot

(6)

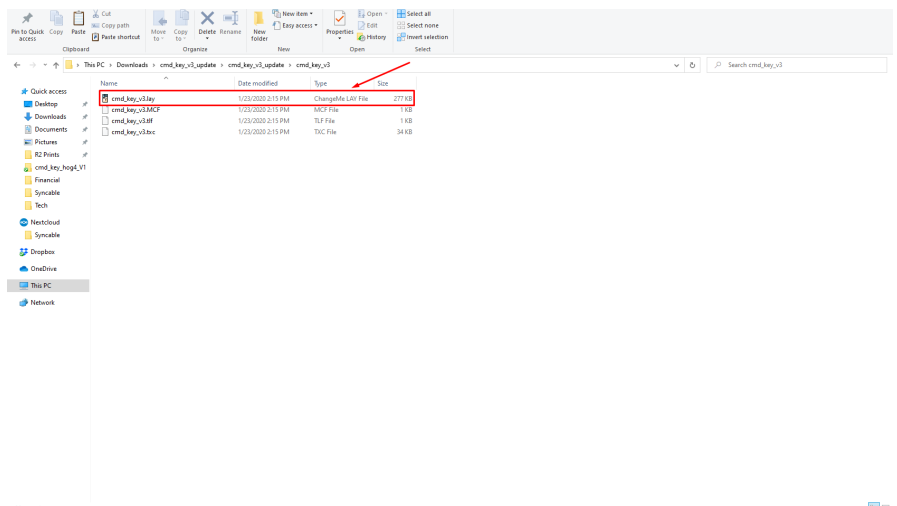

Plug in Keyboard (you must do this before step 7 or you cmd_key might not be found by the update utility.)

(7)

Open **cmd_key_eos_v4** folder

(8)

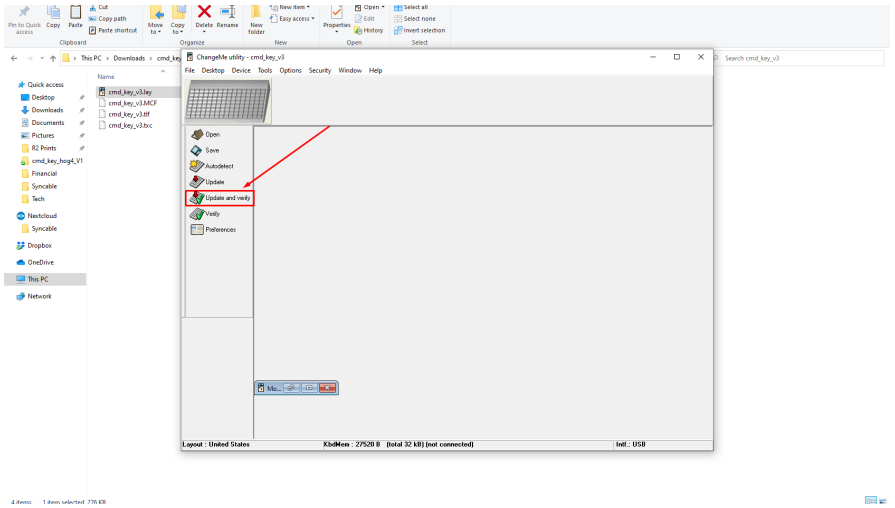

Select **cmd_key_eos_v4** file (cmd_key_eos_v4.LAY)

(9)

In CHANGEME APP click **update & verify**

The installer will update your **cmd_key**. Do not interrupt it any any point. It should take less than a few minutes.

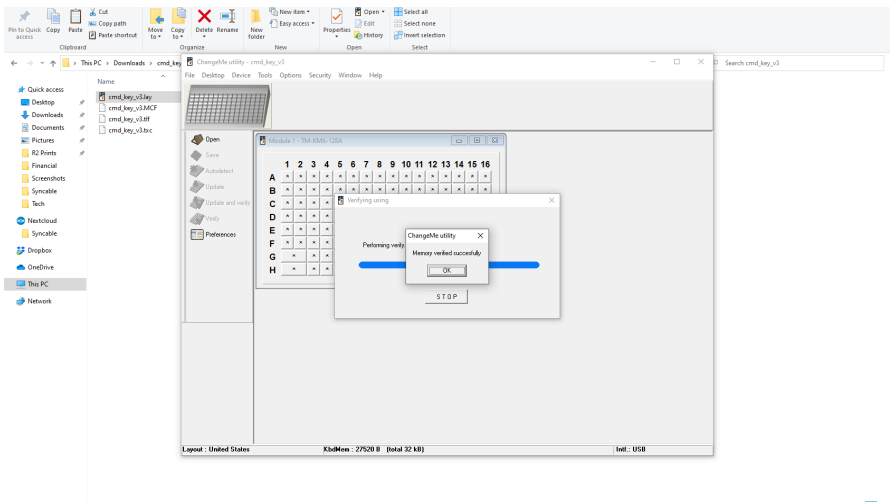

(10)

Congratulations!!

You have completed the updating process.

You can now close the CHANGEME APP and use your cmd_key with EOS 3.1 and above.

Please let us know if you had any issues or concerns.

Please note: your cmd_key is now updated to work with EOS 3.1 and above. It will still work with EOS 3.0, but the STOP EFFECT key will not function.
