

cmd_key™

Programmed for QLab 4

SKU: CMDKEYQv1

Version 1

The **cmd_key** for QLab* is a 94 key keyboard that is programmed and ready to take on programming your next gig with QLab 4*. With “silent” Cherry MX Black keys that are mounted on a steel frame in a small form factor for durability. The **cmd_key** give users a tool for when they want quick hands on access to the most common functions of QLab 4*. Whether used for programming or playback, you won't have to learn the keyboard shortcuts or rely heavily on the mouse/trackpad. The keyboard utilizes a splash of color to allow users to quickly determine key functions. The **cmd_key** has 11 pre-defined macro/hot keys for use in programming or playback. With a built in two port USB hub, you can connect a mouse or other peripherals.

Features

- 94 pre-mapped keys for QLab 4 by Figure 53, LLC*
- Layout to put the most needed keys up front and center.
- Industrial grade Cherry MX Black key switches result in a fluid and silent programming experience
- Sturdy construction built around a steel key frame for reliability and durability
